Education

Wayne State College

Wayne, NE

Bachelor of Science in Computer Science, Minor in Geospatial Technology — GPA: 3.82

Aug 2022 – Dec 2026

Professional Experience

Software Engineer Intern

May 2026 – Present

Vulcraft/Verco Group – Division of Nucor Corporation

Norfolk, NE

- **Developing Source**, a new cloud-based file management system for **Nucor Data Systems**, using **C#, Blazor, ASP.NET Core, Microsoft Azure, and SQL**
- **Engineered the Upload Load Pics** feature in CameraApp, enabling trailer and load image uploads for shipment verification and operational workflows across **10+ Nucor manufacturing plants**
- **Delivered 160+ commits and pull requests** across **three concurrent engineering projects**, demonstrating consistent execution within a collaborative Git-based development environment
- **Automated infrastructure provisioning** by implementing **Infrastructure as Code with Terraform**, improving deployment repeatability and maintainability across cloud environments

Software Engineer Intern

May 2024 – Nov 2024

Daycos

Norfolk, NE

- **Modernized an established enterprise service** using **Node.js, SvelteKit, and Hasura GraphQL**, reducing annual labor requirements from **2,500 to 440 hours**—a **2,060-hour (82%) reduction** in operational workload
- **Contributed to the modernization of system architecture** using **Node.js, SvelteKit, and Hasura GraphQL**, resulting in a **30% performance improvement** and enhancing scalability for future system expansions
- **Diagnosed and resolved software defects** during a beta release supporting **2 enterprise customers**, improving application reliability and production readiness

Projects

ButterFly | *C#, ASP.NET Core, Azure SQL, .NET MAUI, Microsoft Entra External ID*

- **Architecting and developing a full-stack application** using **C#, ASP.NET Core, Azure SQL, and .NET MAUI**, integrating relational data management with cloud-based application services
- **Engineering backend functionality and data-driven workflows** within the Microsoft .NET ecosystem to support application features and business logic

FoundrLab | *C#, ASP.NET Core, Blazor, PostgreSQL, Azure*

- **Developed a full-stack web application** using **C#, ASP.NET Core, Blazor, PostgreSQL, and Azure** to guide rural computer science students through problem discovery and MVP development
- **Implemented backend services and relational data workflows** and deployed the application to **Microsoft Azure**, strengthening cloud application development experience

Leadership & Involvement

Secretary, Association for Computing Machinery (ACM) – Wayne State College

Jan 2024 – Apr 2025

- **Organized** coding workshops, technical project nights, and guest speaker events for **30+ members**, increasing opportunities for technical collaboration and peer learning

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, Python, HTML, CSS

Backend: ASP.NET Core, .NET, Web API, Entity Framework Core, Node.js, RESTful APIs, GraphQL

Frontend: Blazor, React, Next.js, SvelteKit, Tailwind CSS, HTML5, CSS3

Databases: Microsoft SQL Server, Azure SQL Database, PostgreSQL, MySQL

Cloud & DevOps: Microsoft Azure, Terraform, Git, GitHub, CI/CD Fundamentals

Software Engineering: Object-Oriented Programming, Clean Architecture, Agile/Scrum, Code Review, Debugging, Software Testing, Refactoring, Software Maintenance

Certifications: Azure Fundamentals (AZ-900), Foundational C# with Microsoft (freeCodeCamp), ASP.NET Core Fundamentals (Pluralsight)
